

NATIONAL QUALIFICATIONS CURRICULUM SUPPORT

Physics

Uncertainties

[ADVANCED HIGHER]

N E Fancey
University of Edinburgh

G Millar
Daniel Stewart's and Melville College, Edinburgh

This publication deals with the interpretation of experimental data and with calculations of uncertainties at a level appropriate to practical and investigation work for the Higher and Advanced Higher in Physics.

It has been prepared by Dr N E Fancey, University of Edinburgh and Mr G Millar, Daniel Stewart's and Melville College, Edinburgh. It is based on Memorandum No 65, *Uncertainties in Experimental Work*, by Dr E M Wray, University of St Andrews.

**First published 2000
Electronic version 2001**

CONTENTS

| | |
|--|-----------|
| Introduction | 1 |
| Part One: | |
| 1. Accuracy of measurements and uncertainties | 3 |
| 2. Significant figures and scientific notation | 3 |
| 3. Errors and uncertainties | 5 |
| 4. Scientific notation, units and multiples of units and significant figures | 6 |
| 5. How uncertainties arise in experiments | 6 |
| 6. A closer look at uncertainty | 9 |
| 7. Combining uncertainties | 10 |
| 8. Uncertainty calculation | 14 |
| 9. Graphical methods | 18 |
| Part Two: | |
| 10. Use of graphs and spreadsheets | 23 |
| 11. Graphing results with the EXCEL spreadsheet | 24 |
| 12. Uncertainties in gradient and intercept | 25 |
| 13. Note on LINEST | 25 |
| 14. Data handling with a spreadsheet | 28 |
| 15. Comparison of results | 30 |
| Part Three: | |
| 16. Populations, samples and distributions | 33 |
| 17. The mathematics of distributions | 34 |
| 18. The normal distribution | 35 |
| 19. Uncertainties in combinations and functions of variables | 38 |
| 20. Uncertainties in experiments on radioactivity | 40 |
| 21. Straight-line fitting with calculators | 42 |
| References: Further reading, other references, websites | 45 |
| Appendix 1: Units, prefixes and scientific notation | 47 |
| Appendix 2: Calibration uncertainties in instruments | 49 |
