Teeth 2.1b

Teeth 2.2

Name _____ Date _____

What do our teeth do?

We have three different types of teeth.

Incisor

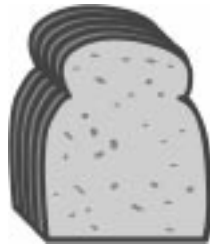

Canine

Molar

They each have an important job to do.
Can you find out what this is?

Eat a piece of bread and identify what each type of tooth does.

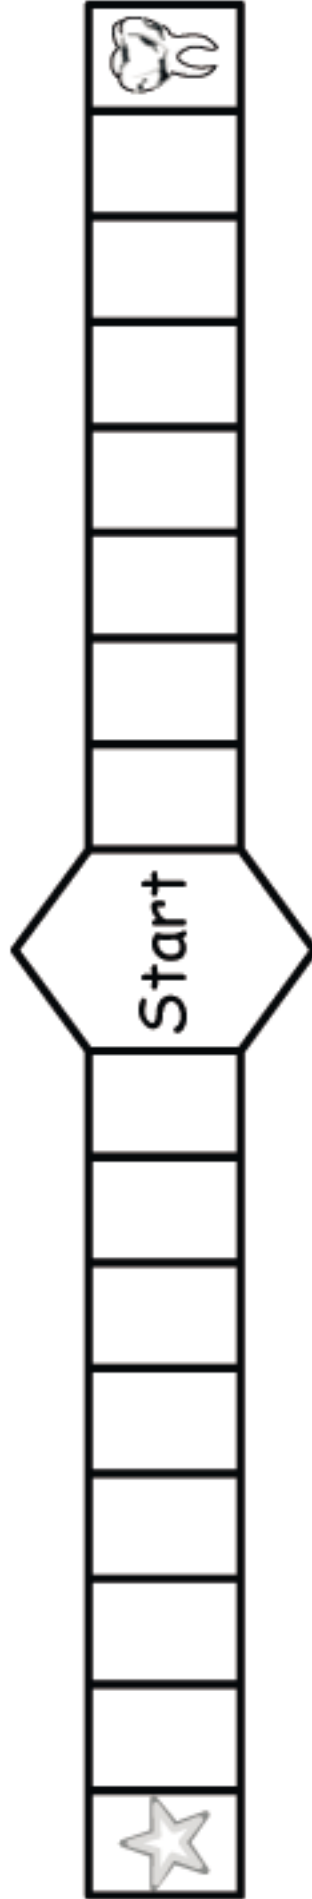

Copy and complete the table.

Tooth	Function of tooth
Incisor	
Canine	
Molar	

Teeth 2.3a

Dangerous Decay

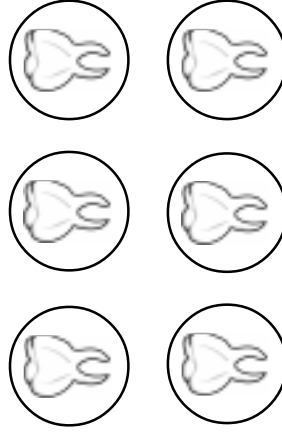

Question cards

A game for 2–6 players. You will need a tooth counter per person and a set of questions. The aim of the game is to answer questions correctly and prevent your tooth meeting 'Dangerous Decay'.

Instructions

1. Place cards on the board.
2. Place teeth counters on the start, and decide who is going first.
3. Player 1 is asked a question from the top card on the pile. This should be asked by the player on his or her left. If the question is answered correctly, the tooth counter should be moved 1 space towards the star. If it is answered incorrectly then it should be moved 1 space towards Dangerous Decay.
4. Player 2 is now asked a question by the player on his or her left and moves his or her counter as outlined above.

5. Play continues like this until a player reaches the star. This player is the winner.
6. If a player reaches Dangerous Decay, he or she must stay there until they answer a question correctly, allowing them to move 1 space towards the star.

Teeth 2.3b

Dangerous Decay (cards)
